

**TIMUR MUSTAFIN**  
Senior Backend Developer

**i Location:** Serbia, Belgrade  
**Relocation:** EU, USA, Canada  
**Employment:**  
Full-time, Remote

**Languages**

English: C1  
Russian: Native

**Contacts**

 muutim@gmail.com  
 https://mustafin.info/

**Core Skills**

**Languages & Frameworks:**

- Python
- Django
- FastAPI
- Flask
- JavaScript
- React.js
- Node.js

**Databases:**

- PostgreSQL
- MySQL

**Cloud & DevOps:**

- Docker
- Kubernetes
- AWS
- Git
- CI/CD pipelines

**AI/ML:**

- TensorFlow
- scikit-learn
- NumPy
- SciPy

**Other:**

- RESTful API
- microservices
- asynchronous programming
- system design

**Soft Skills**

- Communication skills;
- Attention to detail;
- Analytical thinking;
- Creative mind;

**WORK EXPERIENCE**

 **Quantum Zen Systems** 04/2023 — 03/2025 | 1y 11m | Remote  
Senior Backend Developer

- Designed and implemented scalable microservices for data processing, improving throughput by ~40%;
- Applied ML algorithms for process optimization and anomaly detection, reducing manual intervention by 25%;
- Built integration pipelines for external/internal systems, ensuring high reliability and maintainability;
- Automated CI/CD pipelines, cutting release cycles from weeks to 2 days;
- Built automation scripts and internal tools that cut manual workload by ~20%
- Managed the lifecycle of ML models: version control, monitoring, and CI/CD deployments;
- Mentored 5 engineers, introducing async programming practices → API latency reduced by 25%.

**TechStack:** NumPy, SciPy, TensorFlow, scikit-learn, PostgreSQL

 **Quantum Zen Systems** 02/2022 — 04/2023 | 1y 3m | Remote  
Full Stack Developer

- Built and maintained microservices-based architectures with Django + React.js;
- Refactored legacy code with async programming, improving API performance by 25%;
- Designed PostgreSQL databases and implemented unit/integration/E2E tests;
- Developed scalable REST APIs consumed by multiple client applications;

**TechStack:** Django, Flask, React.js, Node.js, PostgreSQL, AWS, Docker, Git

 **ArtStyle Group** 11/2017 — 02/2022 | 4y 4m | On site  
Backend Developer

- Developed automation tools and chatbots, increasing customer service efficiency;
- Implemented custom authentication/authorization protocols, strengthening security;
- Developed and implemented scalable microservices systems and data processing pipelines;
- Created software and automation tools to enhance operational efficiency;
- Administered AWS environments, automated deployment pipelines;
- Optimized UX for high-traffic e-commerce platforms, serving thousands of daily users;

**Projects:** obi.ru, ratingruneta.ru, cmsmagazine.ru, workspace.ru

**TechStack:** Python, JS, Flask, Kafka, jquery, Docker, Git

 **Advanced System Technologies** 09/2013 — 05/2016 | 2y 9m | On site  
DevOps Engineer

**EDUCATION**

Master's Degree in Finance & Credit, MAEL University (2012). Focus: Applied Statistics & Financial Systems

**ABOUT ME**

Backend-focused Software Engineer with **12+ years** in IT and strong expertise in Python, Django/FastAPI, PostgreSQL, and cloud-native microservices. Proven experience in designing scalable systems, building APIs, and integrating DevOps/CI/CD pipelines.

Skilled in AI/ML applications for business process automation. Adept at collaborating with distributed teams, making technical decisions, and delivering high-impact solutions.

- I strive to write clean, optimized, and secure code;
- I possess strong analytical skills, continuously learn new technologies, and collaborate effectively with teams;
- I possess strong communication and leadership skills (mentored teams of 5–7 developers, collaborated with distributed teams across multiple time zones);
- Experienced with Agile/Scrum methodologies;
- I develop scalable, high-performance, and resilient systems;
- Continuous learner in AI, automation, and scalable backend design;
